

İSTANBUL  
metal sanayi ve ticaret a.ş.

Since 1956...

LEADING METAL TRADER OF TURKEY

## ABOUT US

Founded in 1956 in the well known, traditional Galata trading district of Istanbul, as a small enterprise, our company enlarged its volume and the number of items traded, over time and changed its name to Istanbul Metal A.S. in 1980.

To be able to handle the expanded volume, increased number of staff and multiplied warehousing needs, the company moved to the Bayrampasa area, in the industrial zone of Istanbul. At the same time, a large warehouse facility of 5000 sq.m. size has been built in the Kirac – Hadimkoy area, close to the main transit highway, connecting Turkey to Europe. To cope with the location change industry, in 2013 we moved our headquarter offices and warehouse to İkitelli-Basaksehir area, where we have expanded office and warehouse facilities under one roof.

Istanbul Metal prides itself with its reliability, high service quality and customer satisfaction, together with providing good quality material at competitive prices to the industry in Turkey and surrounding countries.

With its long history of unparalleled performance of over 65 years in the market, Istanbul Metal is one of the best known and respected companies in Turkey, in its field. We are accredited with the ISO 9001:2015 Quality Standard Certificate issued by Bureau Veritas.

Our company follows the world markets closely and has close contacts and relationships with good suppliers all over the world, from Europe to China, from South America to Africa and Russia.

## MISSION & VISSION

With its more than 65 years of uninterrupted continuity, which is uncommon in Turkey, and its vast experience, and expertise in international and domestic markets, our company has a leading position in its sector. Our mission is to continue our company's leadership position in the market and develop it.

We are an owner managed company. With the combined effort of the first and second generation owners and their hands-on day to day management, our aim and vision is to keep on introducing new and better products to our market and to improve the service level to our customers.

## QUALITY

Istanbul Metal Sanayi ve Ticaret A.Ş has been certified with the ISO 9001 : 2015 quality standards certificate since the year 2000.

Within our continued efforts to maintain our leading position in the Turkish Metal Sector, we have implemented all the necessary requirements of the ISO 9001 : 2015 management systems, thus providing a high service quality along with supplying high quality material to our customers in the Turkish Market. Our company is being re-audited every year by the Bureau Veritas organisation and is keeping up its high quality standards.
